

Royal Incest are back

Founded 1992 near Münster, alternative five piece Royal Incest recently have finished their work on the third album „Queen of Drama“, to be released on May21st.

The new studio album is, as it was expected, again a powerful mix out of Grunge, Punk and Indie Rock. It contains 9 brandnew songs, recorded and produced within only one weekend in the well known D.I.Y. Or Die - Studios in Dortmund, Germany. The long player will be available in all stores as LP, CD and Digital.

The title track Queen Of Drama describes the broken dream and the sadness of a girl, that cannot find her great love. Her depression makes her weep and let's her appear with a tearstained make up, not willing to live any longer.

The opener Democracy and freedom is a reminder on the oppression and terror of the nazi regime before and in World War I and II. It's aim is to stand up and fight for democracy and freedom.

The track Invitation tells the story of a serial killer, that offers young girls (his potential victims) a luxury life with servants in his castle (golden cage), where everyone's pretty and noone gets old. After he enticed them, they are being tortured and killed brutally in his chain.

Anyway, the powerful vocals of shouter and guitarist Johannes Hofmann, the heavy steams of the two further guitarists Karl Funnemann and Claus Stephan, the rhythm section around Christoph Linhoff (bass) and Dominik Lenz (drums), as well as diverse edgy and emotional tunes, come along sometimes elegic, politically motivated and always very facettive.
